SPIRIT EVENT

Spirit Event delivers experiences in connection with your conference and offers activities both indoors and outdoors. You can find a presentation of the range at www.spiritevent.se with, among other things, Music quiz, Da Vinci's box, the surf sport SUP and more! A popular activity is Rocket Science where teams build a water rocket that sends an egg 30m into the air, where the challenge is that the egg is whole when it lands. With limited materials, the participants must construct a functioning rocket AND build a device that protects the egg from breaking. In the dramatic finale, the team's constructions get to show their colors. Rocket Science is a fun team exercise for large and small groups where creativity takes center stage as you develop communication and group dynamics. An entertaining way to get to know each other's skills and characteristics.

PLAYING TOGETHER / SAMSPEL

Team building as it should be. In "Samspel" there is no competition within the group. Everyone works together to achieve the best possible result. Even if the saxophonists play fantastically and the trumpeters are great, the final result will not be good if everyone does not play the same tune, is responsive to each other, follows their leader. Interaction provides direct feed-back if the collaboration doesn't work. In the beginning it will sound miserable, but pretty soon you hear a clear improvement. When you finally sit down and play We Will Rock You together on instruments you didn't even think you could get sound from, the feeling is fantastic!
